ABC's The keys are brilliantly labeled, making the notes of a song easy to locate.

MCS Lights Makes locating Easy-Play Chords fast.

Specifications

Carnival®

Making music is fun and playing the organ may even make you healthier¹. The Carnival organ makes discovering the hobby of making music effortless and enjoyable. Lowrey's easy-play design will have you making music right away. **M.C.S.** (Music Chord System) makes playing many lower keyboard chords possible with just one finger. The lower keyboard M.C.S. Lights guide you to those keys: **red** is for "C", **blue** is for "F", and **green** is for "G" chords. Open your Lowrey songbook and follow the color-coded music. Additionally, all of the music in the Lowrey Magic Organ Course² utilizes the same style of color-coded music.

Flip on the **ABC's** switch and all the keys become brilliantly labeled, making the notes for a song easy to locate. The lighted ABC's combine with Easy-Play³ music notation, which places the letter name of the note inside each note of a song, to get you making music immediately. Again, the Lowrey songbook and all of the Lowrey Magic Organ Course materials use Easy-Play music notation.

Press one of the blue-colored **Rhythm Style** buttons and then press the **Rhythm Preset** button and the entire organ is set up and ready with an appropriate selection of sounds. If you choose to play a song without an accompanying Rhythm Style then simply press the Easy button to activate the M.C.S. feature, one-finger chords; **Chord Memory**, which continues sounding the last chord played (even after the key has been released) and **Automatic Bass**, which plays the bass pedals for you. Four **General Preset** buttons provide four complete organ setups, too. Just press a button.

DETAILS: 2-44 Note Keyboards, 13 Bass Pedals, Stereo Sound System, Stereo Headphone Output.
Dimensions: 42.25 wide, 21.25 deep, 39 high - cabinet, 45.75 high - top of music rack

¹ The Music Making and Wellness Project has shown that group organ classes conducted in a supportive, socially enjoyable setting may give adults significant health benefits.
² The Lowrey Magic Organ Course is an adult learn-to-play organ class, conducted at participating Lowrey dealers. The course features 12-10 week levels with 10 songs contained in each level.
³ Easy-Play Notation is a registered trademark of Hal Leonard Publishing Corporation.
⁴ Basic works with any Rhythm Plus Orchestration Style. The Basic feature is useful for playing a new, or unfamiliar song by providing a "Basic" rhythm pattern to follow.
⁵ AOC makes a single upper keyboard note sound like you are playing many.
